Laravel, PHP, React, Vue.js, MySQL, Docker, Git, Linux, Nginx, CloudFlare, CI/CD, Postman, VS Code, Antigravity AI, Python, Dart, Rust, PostgreSQL, MongoDB, SQLite, Redis, Tailwind CSS, Flutter, ionic, CodeIgniter, Postgres, n8n, PCI-DSS, FPX, TikTok Shop

Work experience

Full Stack Developer · Aafiyat Digital Sdn Bhd

2025-08 – Present

Architected and developed an end-to-end internal sales platform utilizing Laravel and React, streamlining sales workflows and order management operations across teams. Designed and deployed high-performance microservices and RESTful APIs using Laravel Lumen to support high-concurrency order processing and real-time sales transactions. Integrated third-party payment gateways to facilitate automated, secure checkout experiences and multi-channel transaction reconciliation. Connected logistics and courier API services (Ninja Van, DHL, Pos Malaysia, and SPX) to automate shipping label generation…

Software Developer · SIMPLEPAY GATEWAY SDN BHD

2023-10 – 2025-07

Designed and integrated FPX and credit card payment modules processing approximately 10 Million Myr transactions per month, implementing tokenization and encryption in line with PCI-DSS requirements. Optimized database queries, caching strategies, and asynchronous job processing, improving core payment API response times during peak transaction traffic. Hardened payment applications against injection, CSRF and insecure-session vectors; remediated all findings from annual PCI-DSS audits with no repeat issues in the following cycle. Automated end-to-end merchant settlement schedules and payout…

Software Developer · 2EN APPS Sdn Bhd

2023-02 – 2023-10

Developed and maintained Laravel web applications for government clients, delivering 8 modules across tender-scoped projects on schedule and within defined scope. Implemented role-based access control, audit logging and server-side input validation to satisfy mandated government security and accessibility compliance standards. Refactored duplicated controller logic into reusable service classes and form request validators, reducing defect rates in subsequent releases.

PHP Developer · Senwave Retail Solutions

2022-03 – 2023-01

Rebuilt CodeIgniter administrative dashboards with filtering, batch actions and export tooling, improving the speed of daily retail operations management for 1000+ store users. Built and documented REST APIs powering an Ionic mobile loyalty application, supporting high-volume user management, points accrual and redemption, and real-time promotional tracking. Owned core modules for user management, promotional campaigns and the loyalty point ledger, adding reconciliation routines that prevented point balance drift across platforms.

Education

- Bachelor's Degree — Universiti Teknologi Mara (UiTM) (2018–2022)
