Work experience

Fullstack Engineer · 3Commas

2025-08 – Present

Developed a Next.js (React + TypeScript) app with focus on performance, SEO, and SSR/SSG.
Led frontend performance optimization initiatives, increasing Lighthouse scores from 30 to 80 on mobile and from 50 to 80-85 on desktop while improving Core Web Vitals and SEO performance.
Partnered with marketing stakeholders to deliver SEO-driven features, landing pages, and growth initiatives.
Built AI-powered automation tools and workflows that streamlined content creation, localization, and operational processes.
Developed AI-powered localization pipelines for Prismic CMS, reducing manual…

Middle Fullstack Developer · HIVEX

2025-03 – 2025-08

Built full-stack features with React, TypeScript, Node.js and Java/Spring, owning implementation across frontend, backend APIs and integrations.
Designed and delivered an end-to-end notification system, implementing backend notification processing and APIs alongside the React UI, unread state/count, filtering and read-status synchronization.
Implemented real-time communication using WebSockets/STOMP, integrating backend events with the frontend and handling connection lifecycle and state synchronization.
Worked with Kafka-based event-driven flows, consuming and processing domain events used…

Frontend Developer (Part-time) · Freelance

2025-01 – 2025-08

Maintained and optimized a sushi delivery website; improved performance and UX.
Developed new pages/features with React + TypeScript; ensured responsive design.
Tested, debugged, and deployed updates in collaboration with the client.

Fullstack Developer · CuboDrom

2021-08 – 2024-09

Developed and maintained an e-commerce platform with React, Node.js, and Express.js.
Built end-to-end GraphQL features with Node.js and React/Next.js, implementing queries, mutations, resolvers, database integration, and client-side cache synchronization.
Built REST API endpoints and server-side business logic for e-commerce workflows.
Implemented authentication and authorization with JWT for protected API routes and user sessions.
Built WebSocket-based features and handled real-time communication between the Node.js backend and React frontend.
Integrated backend APIs with the React frontend…
