CV-008

Software Engineer Lead

Henan Asset Management · Engineering

Skills

TypeScript, JavaScript, Go, SQL, Python, Nestjs, Node.js, REST APIs, PostgreSQL, MySQL, Redis, Sequelize, React, Next.JS, Refine, Tailwind CSS, Ant Design, Docker, AWS, CI/CD, Nginx, Github Actions, Jenkins, Kafka, RabbitMQ

Work experience

Software Engineer Lead · Henan Asset Management

2024-11 – Present

Lead the Athens engineering unit of 2 engineers, 1 QA, and 1 product designer, coordinating product discovery, technical planning, implementation, QA, and release execution.
Own OMS improvements handling 1, 000+ monthly transactions, replacing non-system workflows with centralized order, broker email, approval, and portfolio availability flows.
Lead MyHero front-office and revision app revamps, improving transaction and KYC synchronization reliability through maintainable Next.js, NestJS, PostgreSQL, and outbox-inbox flows.
Translate PRDs into technical scope, sprint estimates, acceptance…

Software Engineer · Henan Asset Management

2023-05 – 2024-11

Built investment-management platforms for KYC, transactions, fund operations, reporting, and internal backoffice users.
Revamped internal backoffice systems for internal Ops and KYC Admin teams, supporting 1, 000+ daily transactions and 100+ KYC records while replacing legacy non-system workflows.
Built a fund fact sheet generation web app that replaced Excel-based manual work and reduced a two-week recurring process to minutes across products.
Established AWS cloud infrastructure and CI/CD foundations for internal systems, covering VPC design, deployment workflows, and production…

Software Engineer Intern · Tokopedia

2022-08 – 2023-01

Contributed to internal technology platforms including Intools, GRC platform, and Tokopedia Status.
Developed backend features using Go, PostgreSQL, and Redis in a large-scale engineering environment.

Full Stack Developer · Newtab.id

2020-12 – 2022-01

Developed and delivered custom websites for companies, organizations, and individual clients.
Built scalable web applications using MongoDB, Express, React, and Node.js.
