CV-016

Mobile Developer Lead

Niibu Inc. · Indonesia · Engineering

Skills

Cloud Firestore, JIRA, Team Leadership, clean architecture, CI/CD, Firebase, Azure, Unit Testing, Test Driven Development, Kotlin Programming, Swift Programming, C++ Programming, Agile Methodologies, Performance Optimization, Flutter, MVVM, BLoC/Cubit, Scrum, Github Actions, Selenium, Swift Playgrounds, UIKit, SwiftUI, VIPER architecture

Work experience

Mobile Developer Lead · Niibu Inc.

2026-02 – Present

Lead mobile development initiatives for customer, creator, and service-provider applications featuring AI agent integrations.
Lead development of a customer application that uses an AI agent to support user interactions and services.
Lead development of a creator application that enables content creators to generate content through an integrated AI agent.
Lead development of a service-provider application featuring AI-assisted workflows and a delivery tracking system.
Build conversational chatbot experiences with multiple chat-bubble formats to support customer bookings and…

Senior Mobile Engineer (Flutter) · Wolkk.

2022-10 – Present

Develop scalable Flutter applications using BLoC/Cubit, Clean Architecture, reusable components, and clean-code practices.
Design and maintain a standardized Flutter project template with optimized initialization logic and project structure, improving consistency and development efficiency across projects.
Implement GitHub Actions CI/CD pipelines that improve deployment efficiency by 40% and support more reliable software releases.
Optimize application performance and reduce load times by 30%, improving the overall user experience.
Implement Flutter platform and method channels to integrate…

Flutter developer · Volantis Technology

2021-10 – 2022-10

Contributed to the development of the CUiT mobile application using Flutter, working closely with the engineering team to implement UI/UX improvements and application features.
Integrated Firebase Authentication, Cloud Firestore, Firebase Crashlytics, Firebase App Distribution, and Firebase Dynamic Links to improve reliability and cross-platform functionality.
Developed custom Flutter method channels to integrate a third-party camera AI library written in Kotlin and Swift.
Improved the Buzzco application using Flutter packages, MVVM architecture, and Cubit state management to deliver a more…

iOS Developer · Apple Developer Academy | UC

2021-02 – 2021-12

Developed an interactive educational COVID-19 game using Swift Playgrounds, receiving recognition through the WWDC 2021 Swift Student Challenge.
Built iOS applications using Swift, UIKit, and SwiftUI while applying MVVM and VIPER architecture patterns.
Designed real-time heart-rate monitoring functionality for an emergency safety application on iOS and watchOS.
Collaborated with a multidisciplinary team to design and develop iOS applications featuring intuitive interfaces and innovative functionality.

Mobile Developer Lead · PT ZENIORA EDUKASI TEKNOLOGI

2020-12 – 2022-02

Led development of the Zeniora education application using Flutter, MVVM architecture, and Provider state management.

Guided the mobile development team in optimizing the application, contributing to a top-10 ranking in the Play Store education category and a 4.9/5.0 rating from more than 1,800 reviews.
Introduced Scrum and Agile practices to improve team collaboration, productivity, and delivery consistency.
Integrated the Midtrans payment gateway through a WebView-based implementation.
Built CI/CD pipelines to automate application building, testing, and deployment, accelerating release…

Quality Assurance Internship · PT Sofco Graha

2019-07 – 2019-08

Developed automated Selenium test scripts for a human resources web application, supporting efficient defect detection and software quality assurance.

Assistant Lecturer · Sekolah Tinggi Teknologi Angkatan Laut (STTAL)

2018-01 – 2018-01

Created an introductory C++ programming module.
Delivered practical C++ programming instruction.
Mentored students in foundational programming concepts.

Laboratory Research Assistant · B201 Telematics Laboratory

2017-01 – 2020-01

Led a multidisciplinary team in designing and developing multimedia applications for telematics research and data visualization.
Supported research into multimedia technologies and contributed to the development of experimental applications.
Mentored students in Flutter development and guided them through the creation of mobile application projects.
Developed a laboratory practicum program for students in the Electrical Technology Faculty.
Supervised laboratory assistants and coordinated laboratory testing activities and daily operations.
Supported interactive C++ programming workshops for…
