Work experience

Senior Software Engineer · Maya Bank, Inc.

2025-10 – Present

Leading the Flutter capability initiatives in the Mobile Engineering department, driving the adoption and governance of engineering standards, best practices, and scalable mobile architecture.

Senior Flutter Engineer · UnionDigital Bank Inc.

2025-05 – 2025-10

Played a key role in building new features and improvements for their digital banking app for both Android and iOS, serving millions of users across the Philippines.
Led the development of reusable components for Flutter, boosting developer productivity, and improving scalability.

Senior Software Engineer · Philippine Digital Assets Exchange Inc.

2022-06 – 2025-05

Led multiple projects, managing core services and internal systems utilizing Flutter AWS, Python, and PostgreSQL, enhancing organization's internal operations by 200%. Ensured timely delivery of all project milestones while promoting team welfare and maintaining high productivity.
Contributed as a key member of the department's architecture team, focusing on establishing and enhancing Flutter engineering standards, best practices, and system architecture. Efforts improved cost-effectiveness, code maintainability, performance, scalability, and significantly boosted developer productivity by…

Software Engineer - Flutter · YONDU INC.

2021-06 – 2022-07

Played a key role in building new features for various Globe products for both Android and iOS, serving millions of users across the Philippines.
Led the development of reusable components for Flutter, Android (Kotlin), and iOS (Swift), boosting developer productivity, improving scalability, and accelerating milestone completion by 150%.
Spearheaded CI/CD improvements for all Flutter projects by implementing Jenkins, enhancing deployment efficiency, reliability, and automation. Leveraged JFrog Artifactory for artifact generation and deployments.
Spearheaded the implementation of Static…

Software Engineer · LEENTech Network Solutions Inc.

2020-06 – 2021-06

Developed multiple web and mobile applications across various industries, including e-commerce, entertainment, logistics, food, and ride-hailing, using Flutter, Angular, Laravel, and Firebase.
Gained expertise in integrating 3rd party APIs such as payment gateway APIs and Google services, including Google Maps, to enhance application functionality and user experience.
Collaborated with cross-functional teams, including stakeholders, product managers, business analysts, QAs, and vendors, to prioritize requirements and ensure timely delivery of solutions.
Spearheaded CI/CD improvements for all…

Web Developer - Internship · LEENTech Network Solutions Inc.

2019-06 – 2019-07

Developed an internship job portal for Cavite students using Laravel, PHP, MySQL, CSS, and JavaScript.
Utilized version control systems such as Git and Bitbucket to manage code efficiently and ensure seamless collaboration.

Technology Consultant · Freelance Remote

2018-01 – 2023-12

Built custom web and mobile applications for local and international (US & New Zealand) clients across logistics, hotel, e-commerce, and other industries.
Provided technical consultation and code reviews, improving application performance, maintainability, and security.
Delivered cost-effective and scalable solutions, optimizing infrastructure and operational efficiency.
Collaborated with clients across various industries to translate business requirements into high-performing, user-friendly applications.
