CV-024

Senior QA Automation Engineer

LiSEC Automation LLC · United Arab Emirates · Engineering

Skills

Playwright, Cypress, WebdriverIO, Selenium, TypeScript, JavaScript, Python, SQL, API Testing, CI/CD, DevOps, Agile, Scrum, AI in Testing

Work experience

Senior QA Automation Engineer · LiSEC Automation LLC

2022-03 – Present

Built the company's first UI (Cypress) and API (ReadyAPI) automation framework from scratch, moving the team from manual testing to automation.
Architected a reusable Playwright/TypeScript automation framework covering UI and API testing, with shared fixtures, test-data utilities, environment configuration and CI/CD execution; established it as the standard for new projects including Production Planning, Order Editor and LISAGE Analytics.
Led the migration of existing Cypress suites to Playwright (roughly 200-300 tests per project) using AI-assisted conversion and review workflows…

Software Test Engineer (Automation Focus) · WebReinvent Technologies Pvt. Ltd.

2021-07 – 2022-03

Built WebdriverIO regression suites with API checks for several client platforms, including busy e-commerce stores and recruitment systems.

Software Test Engineer · Credence Systems Pvt. Ltd.

2013-08 – 2015-09

Wrote and ran test plans and test cases for several software modules, and took part in bug triage and sprint planning.
Wrote the team's first Selenium WebDriver scripts, which cut down manual testing time.
Logged and tracked bugs through to fix, working closely with developers and other teams.
