CV-026

Senior Full Stack Engineer

TechMatter · United States · Engineering

Skills

TypeScript, Go, Python, Java, C#, Ruby, Swift, Node.js, Express.js, Django, Flask, Spring Boot, React.js, Angular, PostgreSQL, MongoDB, MySQL, Redis, Cassandra, SQLite, Oracle, AWS, Gcp, Azure, Docker, Kubernetes, terraform, Cloudformation, Jest, Mocha

Work experience

Senior Full Stack Engineer · TechMatter

2022-09 – Present

Developed scalable applications using Typescript and Go, enhancing performance and maintainability across multiple projects.
Designed and implemented CI/CD pipelines utilizing Docker and Kubernetes, streamlining deployment processes and reducing downtime.
Built robust microservices architecture on AWS, leveraging services like Lambda and DynamoDB for efficient resource management.
Created automated testing frameworks with Jest and Mocha, improving code quality and reducing regression issues significantly.
Collaborated with cross-functional teams to integrate AI capabilities into applications…

Full Stack Engineer · Access Healthcare

2017-02 – 2022-08

Developed and maintained web applications using Python and Django, ensuring high performance and responsiveness.
Implemented RESTful APIs for seamless integration with front-end applications, enhancing user experience and functionality.
Leveraged AWS services to deploy applications, ensuring scalability and reliability in production environments.
Utilized Docker for containerization, simplifying deployment and ensuring consistency across development and production.
Conducted automated testing using Selenium and Jest, improving code quality and reducing deployment risks.
Collaborated with…

Software Engineer · Texas Instruments

2012-06 – 2017-06

Developed enterprise-level applications using Java and Spring Boot, focusing on scalability and performance optimization.
Implemented microservices architecture, enabling modular development and deployment of application components.
Managed relational databases with MySQL, ensuring efficient data storage and retrieval for applications.
Utilized Docker for containerization, simplifying the deployment process and enhancing application portability.
Created and maintained automated testing suites using JUnit, improving code reliability and reducing bugs in production.
Collaborated with…

Education

- Bachelor's Degree — University of Houston (2008–2012)

Latest: Computer Science — University of Houston
