GenAI, ML, Python, SQL, LLM applications, RAG, prompt design, model evaluation, Machine Learning, AI-assisted testing, Scikit-Learn, Pandas, NumPy, Azure AI Foundry, AWS Bedrock, Pinecone, MySQL, Docker, Azure DevOps, Git, Linux, C++, Redis, Go

Work experience

Senior Consultant (Data & AI), AI Central · NCSI (HK) Limited

2024-08 – Present

Implemented an end-to-end daily news intelligence application using Azure OpenAI and Azure AI Document Intelligence, combining online and e-paper ingestion, relevance screening, classification, summarisation, semantic search, human review, and automated PowerPoint reporting.
Engineered the news platform with Python, Flask, PostgreSQL/pgvector, embeddings, document-layout reconstruction, Docker, Azure Blob Storage, and an Azure DevOps container build pipeline.
Contribute to a RAG chatbot for a major Hong Kong public-sector enquiry platform, using website and curated intent-response content…

C++ Developer, Payment and Settlement Department · Shenzhen Yeahka Technology Inc.

2021-07 – 2023-07

Developed and maintained payment, settlement, profit-sharing, callback, and risk-control services within a six-person team supporting an online payment platform processing more than 45 million transactions per day.
Led the design and implementation of a Redis cache optimisation project, using one month of transaction-access data to redesign expiration, refresh, and update workflows and strengthen service resilience during database disruption.
Designed and delivered a Go-based risk-control parameter management service with configurable validation, enabling real time updates and reducing the…

Software Development Engineer · Shenzhen Zhongyue Technology Co., Ltd.

2018-07 – 2020-10

Independently developed a face-recognition attendance system adopted across ten educational institutions, covering application development and automated attendance workflows.

Education

- Master's Degree — The Hong Kong University of Science and Technology (2023–2024)
- Xidian University (2014–2018)

Latest: Data-Driven Modeling — The Hong Kong University of Science and Technology
