Work experience

Business Data Analyst · RAKBANK

2025-01 – Present

Engineered and deployed over 10 continuous-monitoring audit dashboards using Power BI and SQL, enhancing issue detection speed by 30% and providing real-time insights to executive and audit teams.
Streamlined data cleaning, transformation, and pipeline preparation through automated ETL processes with SQL and Python, reducing manual audit effort by 40% and accelerating reporting turnaround by 50%.
Developed AI agents to automate repetitive data retrieval and reporting tasks, significantly decreasing analyst query time and minimizing manual intervention across teams.
Translated stakeholder…

Assistant Manager Data Analyst · GFG ALLIANCE

2023-06 – 2024-12

Architected scalable SQL databases and ETL pipelines for order tracking and AP/AR, enabling real-time decision-making and reducing report generation time by 25%.
Conducted exploratory data analysis and predictive analysis on energy pricing using Python, improving data reliability by 25% and contributing to a 12% reduction in energy costs.
Engineered advanced Power BI dashboards to enhance reporting efficiency and accessibility for non-technical users, streamlining data presentation.

Senior Business Data Analyst · Prescience Decision Solutions

2021-12 – 2023-05

Led a cross-functional team of five analysts to coordinate and deliver automation and analytics projects, significantly reducing manual reporting and accelerating delivery timelines.
Conducted sales, inventory, and product analyses using Python, producing daily and ad-hoc reports that enhanced operational responsiveness.
Developed SQL and Power BI reporting solutions that informed leadership decisions and facilitated stakeholder communication for improved service delivery.
Analyzed supply chain, finance, and product performance to identify growth opportunities, conducting financial…

Data Analyst · Mu Sigma Business Solutions

2018-08 – 2021-11

Developed an Employee Voice & Sentiment Analytics solution using Power BI, leveraging Python for NLP, text cleaning, classification, and topic modeling to extract actionable insights from large-scale employee feedback.
Implemented data governance frameworks and end-to-end process flows, enhancing data quality and compliance while improving stakeholder visibility.
Led Agile delivery of analytics initiatives through JIRA and Confluence, coordinating with cross-functional stakeholders to ensure timely project completion and alignment with requirements.
Translated complex data into impactful…
