CV-040

Applied AI Engineer

Bain & Company · United States · Data & AI

Skills

Python, SQL, R, FastAPI, Flask, RESTful APIs, LangChain, LlamaIndex, Hugging Face Transformers, RAG, Prompt Engineering, Model Fine-Tuning, LoRA, Agentic Workflows, TensorFlow, Keras, Scikit-Learn, NLP, Predictive Analytics, Model Explainability, SHAP, LIME, Time Series Analysis, OpenCV, Object Detection, Image classification, Image Segmentation, Pandas, NumPy, Apache Spark

Work experience

Applied AI Engineer · Bain & Company

2024-10 – Present

Applied AI Engineer and Machine Learning professional with 5 years of experience across Artificial Intelligence, Generative AI, Machine Learning, Data Engineering, and Cloud platforms. Experienced in building and deploying scalable AI solutions including LLMs, RAG pipelines, multi-agent systems, MLOps, computer vision, and real-time data platforms using Python, SQL, AWS, Azure, GCP, LangChain, LangGraph, LlamaIndex, TensorFlow, PyTorch, and Docker. Proven ability to deliver production-ready AI systems that improve automation, operational efficiency, and business outcomes at enterprise…

Machine Learning Engineer · Taskmonk Technology Pvt. Ltd.

2020-03 – 2022-05

Developed and deployed end-to-end Machine Learning and Deep Learning pipelines for computer vision tasks (object detection, image classification, image segmentation) and multilingual Automatic Speech Recognition (ASR).
Fine-tuned state-of-the-art architectures-including YOLO, Faster-RCNN, Detectron2, OpenNMT, and Mozilla DeepSpeech-on custom datasets using PyTorch and TensorFlow within AWS cloud environments.
Designed and built low-latency microservices using FastAPI and Flask REST APIs to optimize and serve production-ready cloud ML models.
Implemented comprehensive model evaluation…

Data Engineer · Accenture

2017-05 – 2018-08

Architected and maintained scalable ETL pipelines to ingest, clean, and transform high-volume, multimodal datasets (text, image, audio) into AWS data lakes, to support ML model training and core product features.
Automated data workflows and scheduled regular batch and real-time streaming jobs, keeping data consistently available for production apps.
Implemented rigorous, automated data validation and quality assurance checks across distributed data pipelines, catching anomalies early and ensuring reliable data delivery.
Partnered with data scientists, backend engineers, and product teams to…

Education

- Master's Degree — University of Glasgow (2018–2019)
- Visvesvaraiah Technological University (2013–2017)

Latest: Data Science — University of Glasgow
