CV-004

Full-Stack Software Engineer

NESLIT · Engineering

Skills

TypeScript, JavaScript, Python, SQL, React, Next.JS, Vue.js/Nuxt, Tailwind CSS, React Native, Node.js, Nestjs, REST API design, authentication, background processing, Webhooks, PostgreSQL, MySQL, MongoDB, Redis, Prisma, AWS, Gcp, Docker, Linux, self-hosted infra, Networking, OpenAI-compatible APIs, Gemini, Ollama, Open WebUI

Work experience

Full-Stack Software Engineer · Neslit

2023-02 – Present

End-to-end ownership: Designed and shipped production features spanning PostgreSQL schema design, NestJS APIs, and Next.js/React UIs, owning each feature from data model to deployed product.
AI integrations: Integrated OpenAI and Stable Diffusion APIs into generation workflows, with async job processing (Node.js, Temporal, Server-Sent Events) and live status updates.
Infrastructure & DevOps: Operated across Docker, AWS, GCP, GitHub Actions, and Linux server environments to deploy and run production services.
Developer tooling: Built and maintained a reusable internal component/module library…

Web3 Full-Stack Engineer · eLearningDAO

2022-09 – 2023-07

Built and open-sourced a decentralized e-learning platform (React.js, Node.js, PostgreSQL, Cardano), owning functionality across frontend, backend, and data layers.
Designed REST APIs and backend services for content ownership, authorship, and on-chain asset registration workflows.
Designed and maintained CI/CD pipelines and AWS deployments, automating builds and cloud delivery in an early-stage environment.

Software Engineer · Freelance / UpWork

2022-08 – Present

Deliver full-stack applications and internal tooling independently for startups and clients - spanning APIs, AI integrations, automation, and Web3 services - from requirements through deployment and maintenance.

Full-Stack Software Engineer · TECHCHAPS

2021-01 – 2023-02

Shipped multiple production applications across React, Node.js, APIs, databases, and third-party integrations, working directly across frontend, backend, infra, and product requirements.
Optimized backend logic and DB access for 15% faster APIs; built deployment workflows supporting 20+ releases/quarter and cut page load times by 12%.

Education

- Bachelor's Degree — PMAS University, Rawalpindi (2021)
