Work experience

Platform Engineer · Quesscorp Holdings Pte. Ltd.

2022-11 – Present

Operate GPU fleets (NVIDIA A100 and H100) for training and inference on Kubernetes (Alibaba Cloud ACK, GKE, AWS) and Slurm, with node health checks and automated remediation that drain and replace faulty GPU nodes.
Support distributed training and inference scaling on Kubeflow, Ray, KServe and vLLM, including InfiniBand and RDMA networking for multi-node training.
Upgrade NVIDIA drivers and CUDA across GPU nodes and configure GPU device plugins and the GPU Operator so accelerators are discovered and schedulable as cluster resources.
Monitor GPU utilisation, memory and health using NVIDIA DCGM…

Site Reliability Engineer · Quesscorp Holdings Pte. Ltd.

2022-11 – Present

Operate production Kubernetes clusters on Alibaba Cloud ACK, GKE and AWS, plus Slurm, with node health checks and automated remediation that drain and replace faulty nodes to protect uptime.
Maintain reliability through SLOs and error budgets, a 24x7 on-call rotation and incident response, root cause analysis and runbooks that remove manual operational toil.
Run multi-tenant clusters with namespace isolation, resource quotas and RBAC so teams share capacity without contention.
Deliver applications through GitOps with Argo CD, authoring Helm charts and Kustomize overlays, and run canary and…

Cloud Ops Engineering Senior Analyst · Accenture Pvt. Ltd.

2021-05 – 2022-11

Operated containerised data platform workloads on Kubernetes, including Kafka, Elasticsearch and Flink, covering deployments, upgrades and scaling.
Resolved production incidents on Kubernetes-hosted data platforms, working through root cause and restoring service within defined response and resolution service levels.
Built and maintained CI/CD pipelines in Jenkins and GitLab CI for automated build, artifact management and deployment across environments.
Monitored platform health and logs in Grafana, Kibana and Splunk.
Automated infrastructure provisioning and configuration using Terraform…

Senior Associate – IT Operations Services · Coforge Pvt. Ltd.

2021-01 – 2021-05

Provided L2 and L3 support for Linux production servers, covering service restoration under agreed service levels.
Troubleshot system, storage and connectivity incidents, documenting root cause where permanent fixes were required.
Scripted recurring operational tasks in shell to reduce manual effort across routine administration.
Performed patching, filesystem management and user management on Linux production servers.

Solaris Administrator · AOHR Pvt. Ltd.

2019-12 – 2021-01

Administered Solaris 10 and 11 production estates, including virtualisation with Zones and LDOMs.
Automated backup and monitoring tasks through shell scripts.
Analysed crash dumps and core files to diagnose system faults.

Managed SMF services and ZFS, SVM and VxVM volume management.
Performed patching and boot environment management across Solaris systems.
Replaced disks and configured mirroring and RAID across SPARC hardware.

Solaris Engineer · OIT Pvt. Ltd.

2016-08 – 2019-12

Monitored system performance and resolved server, filesystem and connectivity issues across production environments.
Delivered day-to-day UNIX and Linux administration, covering installations and package management.
Performed patch management across UNIX and Linux production servers.
Managed user and security administration, including RBAC and ACL configuration.
Built and managed Jumpstart servers for network installation of Solaris systems.
Managed NIS and NFS services and scheduled recurring jobs through cron and at.
