Software Engineer

Aytas Tech Solutions Inc. · India · Engineering

Skills

C#, Python, Azure, Docker, Kubernetes, CI/CD, Gitlab, Microservices, CQRS, restful, Apache Kafka, Entity Framework Core, SQL Server, PostgreSQL, MongoDB, Pandas, NumPy, Scikit-Learn, Power BI, Tableau, Semantic Kernel, LLM, RAG, Azure AI, AI-Assisted Development, Retrieval Optimization, AI Evaluation

Work experience

Software Engineer · Aytas Tech Solutions Inc.

2026-06 – 2026-09

Developed and optimized C#/.NET backend services and REST APIs for enterprise workflows, improving response times and efficiency.
Implemented robust validation and error-handling mechanisms, ensuring seamless integration with external database systems.
Collaborated with cross-functional team members on requirements, debugging, code reviews, and testing support.

Full Stack .Net Developer / Technical Lead · World Bank

2022-12 – 2023-10

Architected and optimized microservices-based financial processing systems, improving system performance by 30%.
Built high-performance REST APIs for reconciliation platforms handling large-scale financial data.
Reduced manual processing effort by 60% through automation of validation and reporting pipelines.
Improved code quality and reduced defects using SonarQube and automated CI/CD pipelines.

Senior Software Consultant · Dell Technologies

2021-10 – 2022-07

Led migration of monolithic systems to Azure-based microservices architecture using AKS and containerized services.
Designed and deployed containerized services using Docker and Kubernetes to enhance scalability and reduce deployment failures by 35%.
Built secure APIs with JWT authentication supporting high-volume enterprise transactions and event-driven workflows with Azure Service Bus.

Senior Software Engineer · Apar Innosys (IoT Platform)

2021-01 – 2021-09

Developed backend services for an IoT platform managing real-time data from thousands of ATM devices.
Built event-driven streaming systems using Apache Kafka, ensuring high-throughput data processing and 99.99% uptime.

Software Engineer · Eimskip (Logistics Platform)

2018-09 – 2019-04

Developed full-stack applications using .NET MVC and Angular for global shipment tracking systems.
Built APIs and UI components to optimize logistics reporting dashboards and end-to-end SDLC deployment.

Software Engineer · DXC Technology

2017-11 – 2018-09

Maintained and enhanced enterprise WPF and web applications hosted on IIS, cutting issue resolution time by 30%.
Worked with Kafka to implement efficient messaging-based enterprise workflows.

Software Engineer · RR Donnelley

2014-06 – 2016-10

Built HRMS systems for employee lifecycle automation and optimized database queries for payroll performance.

Education

- Master's Degree — Colorado State University (2024–2025)
- Bachelor's Degree — Anna University (2010–2014)

Latest: Computer Information Systems — Colorado State University
