Node.js, Ruby on Rails, TypeScript, Distributed Systems, Microservices, Apache Kafka, AWS, React, Next.JS, Redux, AngularJS, Tailwind CSS, GraphQL, TypeOrm, Jest, Express.js, Nestjs, C++, Python, SQL, PostgreSQL, MongoDB

Work experience

Sr. Software Development Engineer - 2 · GoComet India Pvt Ltd

2025-02 – 2026-06

Designed and maintained multi-tenant SaaS architecture supporting enterprise customers through configurable workflows, tenant-specific
customizations, and access controls.
Drove microservices architecture improvements across Node.js and Ruby on Rails services, improving modularity and scalability.
Designed and implemented Kafka-based asynchronous workflows to process long-running operations reliably without blocking API
requests.
Built enterprise integrations using REST APIs, gRPC, and Kafka for customers including Mahindra, Agratas, and Vita Coco.
Owned end-to-end delivery across…

Software Development Engineer - 2 · House of Vaaree

2024-10 – 2024-12

Developed full-stack solutions using Ruby on Rails and React.js, contributing to key internal tools that enhanced operational efficiency.
Built the MRP Label Generator, reducing vendor processing time from 3 days to 10 minutes by enabling customers to generate labels
Resolved critical production issues like order sync with marketplaces and data inconsistencies, resulting in improved order reporting
consistency and stakeholder satisfaction.
Designed and implemented an in-house Return and Exchange Flow, replacing the costly third-party solution, saving the company significant
monthly costs and…

Software Development Engineer · NEETPrep GoodEd Technologies

2023-03 – 2024-08

Built complex React and Next.js interfaces, dashboards, onboarding workflows, and learning experiences used by thousands of students daily.
Established the Next.js codebase and integrated AWS (EC2, ECS, S3, Lambda) for scalable, low-latency infrastructure as the first developer
Developed key features like NCERT annotation, Performance Snapshot, revamped question pages (Main Product), Video Library, and
several other core learning features, leading to a 30% increase in user engagement
Led the redesign of the entire platform's frontend, resulting in a 40% improvement in user…

Founding Engineer and Product Owner · Upstepping.co

2022-01 – 2022-11

Built and launched the entire web platform from scratch using Next.js, owning architecture, development, and deployment.
Utilized AWS services (EC2, Route 53, S3) to deploy and manage scalable infrastructure, ensuring high availability and reliable web
performance.

Partnered with 13+ major companies, including Reiman Solutions, Teleperformance, Genpact, and Vcosmos, from Bengaluru, Jaipur, and
Delhi
Enrolled 300+ students on the platform, successfully placed 50+ candidates across partner companies, and provided Recruitment Process
Outsourcing (RPO) services to multiple organizations.

Frontend Engineer · Learn4O

2022-01 – 2022-11

Redesigned the entire website frontend, implementing a more interactive and engaging user interface
Developed key features like an EMI calculator for student loans and a resume builder to enhance the platform's functionality
Led the development of the entire admin dashboard from scratch in Next.js used by teaching assistants (TAs) and the sales team to manage
students and streamline internal operations
Developed backend APIs and server-side logic using Sails.js while building frontend experiences with Next.js.
Deployed applications on AWS and utilized Jenkins for continuous…
