CV-015

Staff Software Engineer / Technical Lead

Ivanti · India · Engineering

Skills

Java, J2EE, Spring Boot, Hibernate, RESTful APIs, Microservices, Spring Security, OAuth2, Core Java, Java EE, AWS, Docker, Kubernetes, Jenkins, Git, Github Actions, DevOps Practices, CI/CD, Kafka, PostgreSQL, MySQL, Oracle, SQL Development, HBase, Apache Phoenix, Hadoop, Spark, ElasticSearch, Agile, Scrum framework

Work experience

Staff Software Engineer / Technical Lead · Ivanti

2021-06 – Present

Technical Leadership & Agile Delivery: Leading a high-performing squad of 5 developers in a fast-paced Agile environment, driving end-to-end delivery of high-quality backend features and complex cloud solutions.
Cloud-Native Platform Engineering: Architectural owner for backend features of Polaris, a Unified Endpoint Management cloud product, utilizing Java, Spring Boot, Docker, and Kubernetes for resilient device management.
Performance Optimization: Redesigned and optimized the Aphid core engine for fetching/caching metadata, successfully introducing support for enterprise VPP calls and…

Staff Software Engineer (Technical Lead Track) · Zyme Solutions (E2open)

2015-10 – 2021-06

Event-Driven Architecture: Architected and designed production-grade Kafka-based event queues, scaling stream processing system throughput, event handling capability, and overall transaction reliability.
Platform Feature Engineering: Developed core capabilities for the enterprise TruePay transaction platform (including Partial Payments, Exchange Currency, and Deal Stacking mechanisms) leveraging Java, Python, Go, Hadoop, and Spark frameworks.
Big Data Optimization: Revolutionized big-scale data pipelines using HBase and Apache Spark, drastically optimizing computing times for intricate…

Technical Lead · Ondot Systems

2011-10 – 2015-09

Fintech Architecture Delivery: Spearheaded the core development of Fi-Core and Management Console modules for a flagship fintech platform adopted by 30+ top-tier US financial institutions, using Java, Spring, Hibernate, and RESTful APIs.
Client Onboarding Modernization: Revamped Management Console to 2.x specification, introducing innovative FI Onboarding architectures and custom Single Sign-On (SSO) OAuth2 Connectors to simplify financial client integrations.
End-to-End Solutions: Directed full-lifecycle engineering for secure payment modules (including Card Replace and Fraud Watch systems)…

Senior Software Engineer · Zycus Infotech

2009-06 – 2011-09

Built eProc procurement systems and custom high-speed Cache Components using Java, Spring AOP, and Hibernate.

Software Developer · Nucsoft Ltd

2008-07 – 2009-05

Enhanced online transaction engines using enterprise J2EE, MySQL, and Apache Tomcat configurations.

Education

- Master's Degree — K J Somaiya Institute of Management Studies and Research
- Bachelor's Degree — University of Mumbai

Latest: Computer Applications — K J Somaiya Institute of Management Studies and Research
