Work experience

Quality Assurance Engineer · PT XLSMART TELECOM SEJAHTERA TBK

2025-07 – Present

Perform functional, regression, sanity, integration, API, and end-to-end testing across enterprise web, mobile, backend, and database-driven telecommunications systems.
Create test scenarios and test cases from business requirements, change requests, technical specifications, and operational flows; document defects with clear reproduction steps and supporting evidence.
Validate Retail Outlet registration and lifecycle flows including creation, approval, updates, listing, migration, downstream synchronization, and post-migration sanity checks.
Test event and ad-hoc sales flows covering outlet…

tester project · PT Smartfren Telecom Tbk

2024-08 – 2025-07

Executed functional, regression, integration, sanity, and UAT testing for telecommunications applications, incentive platforms, retailer operations, and redemption features.
Validated festive bonus and incentive calculations against campaign rules, including sell-through tiering, voucher categories, service plans, KPI achievement, derived KPIs, caps, reconciliation, publishing, and reporting.
Investigated calculation and dataset discrepancies by comparing expected business formulas with application results and backend data using SQL, BigQuery, and Greenplum.
Tested MFA/OTP flows across SMS…

Software Quality Assurance · KipasKipas

2023-02 – 2024-06

Performed software quality assurance activities for product releases, including functional, regression, exploratory, and user-flow validation.
Created and maintained test scenarios, documented defects with reproducible evidence, and collaborated with product and development teams during verification and retesting.
Contributed to product quality across user experience, interface behavior, and core application functionality.

Web Developer · PT. NOTO TEKNOLOGI INDONESIA

2019-11 – 2020-04

Created and designed a web-based financial management system during an internship assignment.
Worked with web development technologies and relational database tools including MySQL and phpMyAdmin.
