CV-025

Site Reliability Engineer

Garanti BBVA (via VBT Software) · United Arab Emirates · Engineering

Skills

Java, .NET, Microservices, Kubernetes

Work experience

Site Reliability Engineer · Garanti BBVA (via VBT Software)

2026-03 – Present

Strengthen the reliability, scalability, and production performance of business-critical banking systems while applying a software engineering approach to operational challenges.
Automate infrastructure and deployment workflows, reducing manual intervention and improving release consistency and operational efficiency.
Monitor the health and performance of 100+ microservices, enabling earlier risk detection, supporting high availability, and reducing incident response time by 25%.

Senior Backend Developer · Akbank (via Veripark)

2024-07 – 2026-03

Designed scalable API architecture and high-performance services with Java and Spring Boot, applying API Gateway, OAuth2/JWT, rate limiting, and system design principles while migrating 15+ microservices from REST to gRPC and reducing latency by 35%.
Modernized legacy applications by migrating them from .NET Framework to .NET 8.0/Core and strengthened release quality through unit testing, integration testing, xUnit, and Postman.
Managed production application lifecycles with OpenShift, Kubernetes, and Docker, using Kafka and MQ-based logging and error analysis to improve operational…

Senior Software Engineer · DORUK AUTOMATION

2021-01 – 2024-07

Delivered MES/MOM software that optimized manufacturing workflows and operational efficiency across Industry 4.0 environments.
Built and integrated real-time data collection, analysis, and visualization capabilities across 20+ production lines, connecting machines, sensors, and enterprise systems.
Streamlined collaboration and delivery through Azure DevOps Server, automated build and deployment pipelines, and structured application lifecycle management.

Analyst Software Developer · Monovi

2020-07 – 2021-01

Implemented track-and-trace systems and provided 24/7 software support for JTI, managing the full incident lifecycle from reporting to resolution in accordance with SLAs.

Education

- Master's Degree — Yasar University (2023)
- Bachelor's Degree — Yasar University (2020–2023)

Latest: Computer Engineering — Yasar University
