Work experience

Software Engineer · SureCost

2022-09 – 2026-03

SureCost is a pharmacy procurement SaaS company helping independent and enterprise pharmacies manage purchasing, pricing, and supplier relationships through a web-based platform. Full stack engineering here means working on features that pharmacy clients use daily to manage real purchasing decisions, where UI performance, data accuracy, and API reliability have a direct impact on their operations.
Built a parallel React and TypeScript frontend to decouple business logic from a legacy JSP monolith, organizing the codebase into a modular component design system that made the platform…

Registered Pharmacy Technician Customer Service · Publix Supermarkets

2011-12 – 2022-09

Executed high-accuracy prescription fulfillment and inventory workflows in a strictly regulated pharmaceutical environment, maintaining operational reliability and compliance across a high-volume retail pharmacy.
Developed strong communication, attention to detail, and the ability to manage multiple competing priorities accurately under sustained pressure - transferable skills that carry directly into collaborative software engineering and client-facing product delivery.
