CV-043

Senior Data Scientist

Airbnb · United States · Data & AI

Skills

Experimentation, A/B Testing, Causal Inference, Statistical Modeling, Predictive Analytics, Classification, Regression, Xgboost, Feature Engineering, Model Evaluation, SHAP, LLM, RAG, Prompt Engineering, Embeddings, Vector Search, AI Quality Metrics, SQL, Python, Airflow, ETL/ELT, Data Quality, Data Modeling, Feature Pipelines, AWS, Azure, Databricks, Snowflake, BigQuery, Spark

Work experience

Senior Data Scientist · Airbnb

2018-08 – Present

Engineered analytics for Airbnb's Listing Accuracy Verification behavioral signals, reservation outcomes, review text, and host activity patterns into a trust-scoring framework that improved inaccurate listing detection across millions of listings and guest-host interactions.
Built measurement strategy for In-Home Accessibility instrumentation requirements, and experimentation roadmaps that guided product investments across the guest booking journey.
Designed and evaluated high impact product experiments using Python, SQL, and causal inference techniques, influencing roadmap decisions across…

Data Scientist · Uber

2015-03 – 2018-08

Directed measurement and optimization initiatives for Uber's Driver Growth Virality programs referral performance and accelerated network expansion across global driver acquisition channels.
Built marketplace pricing and elasticity models using scikit-learn and gradient boosting techniques, optimizing growth investments across driver acquisition channels.
Executed large-scale A/B testing programs for onboarding, referral, and incentive products, quantifying causal impact and informing multi-million-dollar investment decisions.
Developed forecasting models for driver supply growth and…

Education

- Master's Degree — Northwestern University (2013–2014)
