# CV-096

## Founder and Author

Independent · Indonesia · Leadership/Other

### Skills

Go, google cloud, Kubernetes, Gitlab CI, MySQL, Redis, ElasticSearch, Datadog, Grafana, Java EE, JSF, Hibernate, MyBatis, Spring, JBPM, Jasper Reports

### Work experience

#### Founder and Author · Independent

2026-07 – Present

- Runs an independent engineering writing and speaking practice on payments, fraud and platform-system design.

#### Software Engineering Lead (acting Engineering Manager) · PT Amartha Financial Group

2025-01 – Present

People and team leadership

- Lead the Payment Platform team of 7 engineers (Jan 2026 to present), after leading 4 senior/SSE and 6 junior-mid engineers as Engineering Lead for Payments (Mar 2025 to Jan 2026). Acting as Engineering Manager since H1 2026:

sprint rituals, delivery, 1:1s, and career coaching.

- Moved the team from hero execution to distributed ownership: delegated Flip onboarding, the payment dashboard, adapters, and receipt to senior engineers while keeping architectural accountability. Two engineers shipped multi service features without escalation.
- Manage a direct report…

#### Principal Software Engineer · PT Amartha Financial Group

2024-10 – 2025-01

- Fixed unclear payment lifecycle and workflow decisions that slowed teams, started the in-house fraud detection system, and defined internal ownership and integration boundaries for reconciliation, before moving into the Payments lead role.

#### Staff Software Engineer · PT Fliptech Lentera Inspirasi Pertiwi (FLIP)

2022-04 – 2024-10

- Led a multi-team, multi-year re-architecture of Flip's payment core (workflow state machine, event-driven architecture, advanced routing, multi-provider adapters), setting direction for the move from monolith to microservices.
- Owned the technical design and MVP delivery of Flip's fraud service (account takeover, KYC abuse, transaction abuse, promo and referral abuse) with Product and Risk, running in production.
- Tech lead for Recon. Recon 2.0, a multi-year one-team initiative, cut integration time with the payment experience team 3x. Splitting assignment topics per bank cut…

#### Senior Software Engineer · PT Bank Aladin Syariah

2021-02 – 2022-04

- Built the foundational backend architecture for Aladin's digital banking platform: hexagonal layering, context propagation, OpenTelemetry, logging, and service scaffolding.
- Designed first-party authentication (JWT, key-exchange handshake), customer-data encryption, PIN and login challenge flows, and OAuth authorization for third-party linkage.
- Built the Alfamart kiosk top-up and withdrawal integration with token-based validation and SMS and email notification.
- Worked with an external pentester to close major vulnerabilities across platform banking APIs before launch.

Tech: Go, Google…

### Lead Software Engineer · PT Menara Inovasi Realti (SpaceStock)

2020-07 – 2021-02

- Managed a team of 8 engineers on the supply-side platform: verified agents and branches, listing management, and RBAC.
- Led adoption of a GraphQL federation layer in Go to standardize client and backend communication across squads.

Tech: Go, GraphQL, AWS ECS, NSQ, MongoDB, Redis, Elasticsearch, Prometheus, Grafana, CircleCI

### Software Engineer to Senior Software Engineer · PT Nusantara Elang Sejahtera (TIX ID, part of Dana and Emtek)

2018-08 – 2020-06

- Built the loyalTIX loyalty engine and the gift-redemption integration with Dana Voucher.
- Doubled cinema-partner ticket issuing throughput with message queuing and caching, and grew CGV ticketing market share by 30% through a new integration.
- Rebuilt search and filter on Elasticsearch, cutting schedule navigation latency 3x.

Tech: Go, GraphQL, AWS, RabbitMQ, PostgreSQL, Redis, Elasticsearch, Prometheus, Grafana

### Senior Software Engineer · PT Tokopedia

2017-02 – 2018-08

- Shipped the "Peluang Pesanan" MVP, reducing order cancellations by 30%.
- Rebuilt the full-stack Cart application, lifting checkout conversion by 20%, and added cart-abandonment analytics and recommendations.

Tech: Go, AWS, NSQ, Nginx, PostgreSQL, Redis, Elasticsearch, Datadog, Prometheus, Grafana

## Education

- Bachelor's Degree — Budi Luhur University (2018)

Latest: Computer Science — Budi Luhur University
