- Monitor receivables and work with the sales team on collection

- Work with the procurement team on credit terms to improve cash flows

Budgeting & Forecasting

- Collaborate with department heads to develop departmental budgets and forecasts
- Monitor budgets, expenditures, and costs, providing variance analysis and recommending corrective actions as necessary
- Work closely with department heads to track and control expenses within budgetary limits
- Analyze financial data and trends to provide insights and recommendations to the senior management team
- Contribute to the development of cost-saving strategies

Financial Process Improvement

- Identify opportunities for process improvements in financial operations
- Implement efficient financial procedures and systems to enhance accuracy and productivity
- Streamline financial reporting processes
- Lead the finance team and collaborate with other departments in the integration of ERP systems, financial software and data analytics tools for streamlined financial processes

Compliance with Financial Regulations

- Ensure compliance with local and international financial reporting standards, and local laws and regulations on financial related areas
- Manage internal controls and financial procedures to maintain compliance and mitigate risks
- Liaise with auditors and regulatory authorities during financial audits

Stakeholder Communication

- Communicate financial information effectively to non-finance stakeholders
- Provide financial insights and recommendations to support strategic decision-making
- Build and maintain relationships with external partners, such as banks, vendors, tax agents and auditors

Experience

- Minimum 15 years' experience in accounting in the manufacturing sector, with at least 8 years in managerial capacity
- Strong cost accounting knowledge and several years of working closely with the operations team in a factory are essential
- Strong command of the English language
- High proficiency in Excel and PowerPoint for data analysis and presentations
- Able to lead the finance team and work with other departments to implement applications and/or improve processes.
- Proven expertise in financial planning, analysis, and budgeting processes.
- Excellent problem-solving and decision-making skills with a strategic mindset.

Qualifications

- Bachelor's degree in Finance, Accounting, or related field
