Deployment Strategist

Singapore, Singapore · full time · SGD 9,000 – 20,000

Deployment Strategist - Role Overview

As a Deployment Strategist at the client, you'll own the successful delivery of AI solutions for enterprise customers - turning ambitious AI initiatives into real, measurable outcomes.

You'll lead complex implementations from early scoping through production launch, working closely with customers and internal teams to align on requirements, timelines, and success metrics. You'll ensure that each deployment is well-coordinated, executed on time, and set up to scale.

This role is ideal for people who enjoy operating at the intersection of technology, execution, and customer collaboration, and who take pride in making complex projects land smoothly.

What You'll Do

- Own and lead delivery of the client's platform and AI agents for enterprise customers
- Scope requirements, success metrics, and integration plans for Pilots and onboardings
- Coordinate platform implementation, integrations, and agent refinement toward production launches
- Align Product, Engineering, and customer teams on deliverables, timelines, and SLAs
- Monitor AI agent performance in production and drive follow-up improvements
- Identify and develop new AI use cases with customers to expand adoption and impact
- Track progress, manage risks, and remove blockers throughout the delivery lifecycle

What We're Looking For

- Comfort working with technical concepts such as APIs, data flows, and system integrations
- Ability to manage multiple stakeholders and keep complex efforts moving forward
- High-agency mindset: you don't wait for perfect requirements and are comfortable creating clarity, proposing direction, and driving decisions
- Proactive, hands-on mindset and interest in AI-driven products
- Strong communication skills, project management, organization
- Bachelor's degree in Computer Science or a related technical field or equivalent experience

Nice to Have

- Engineering background or prior hands-on technical experience
- Background in management consulting, strategy consulting, or technical consulting, with experience leading problem discovery, structuring ambiguous problems, and working with senior stakeholders
- Experience working in a high-growth or early-stage startup environment

Principal, Data Science

Boston Consulting Group · Singapore

Hired for: Deployment Strategist

Skills

Python, SQL, Spark, Git, Docker, GCP, AWS, Azure, Gurobi, Tableau, Personalization, Optimization, Forecasting, Machine Learning, Data Science

Work experience

Principal, Data Science · Boston Consulting Group

2025-09 – Present

Led a personalization initiative for a SEA FinTech, developing reinforcement-learning-based models that improve engagement and conversion across channels.

Lead Data Scientist · Boston Consulting Group

2021-05 – 2023-10

Partnered with a North American title insurance provider to revamp underwriting operations using AI/ML, applying NLP and graph-based modeling to automate document and entity analysis for 100K+ properties.

Led ideation and roadmap definition with senior stakeholders, translating ambiguous business challenges into deployable data products that delivered measurable underwriting speed and accuracy improvements.

Directed cross-functional data science teams through full-lifecycle delivery, from feature design to production rollout, integrating with engineering and product teams.

Implemented processes for experimentation, reproducibility, monitoring and model governance.

Data Scientist / Senior Data Scientist · Boston Consulting Group

2017-09 – 2021-04

Built personalization and targeting engines for a global fashion retailer and a U.S. life insurance provider, integrating ML outputs into millions of daily marketing communications.

Developed lead-scoring and prioritization models for a U.S. payroll platform.

Designed demand forecasting frameworks for a U.S. grocery chain using alternative data during COVID disruptions.

Led promotion strategy optimization for a U.S. jewelry retailer with day-by-day and product-level ML models that improved campaign ROI and inventory turnover.

Data Science Consultant · Deloitte Consulting LLP

2016-07 – 2017-08

Established analytics & data strategies for targeted ads delivery for a US TV provider.
